

Fiber Optics Distribution Box

GP31-1P01A

Overview

LongXing's fiber optics distribution box GP31-1P01A is suitable for separating indoor and outdoor equipment in optical fiber communication system. It can be used for connecting various optical fiber connectors to facilitate optical fiber line testing and modification. With simple and beautiful appearance, extensive and rich functions, simple and convenient installation methods and other three characteristics.

Features

- Integrated with optical cable, tail fiber connection, tail fiber, jumper and other functions.
- The remaining length of each line is protected by disk storage.
- With screw fixing mode, it can be easily fixed on the wall or where users think appropriate.
- Small shape, convenient construction.

Dimensions and Capability

Dimensions (L*W*H)	90*81*21mm
Material	ABS
Color	White
Capacity	1 Core
Adaptor	SC/LC/FC
Weight	66g

Shipping Information

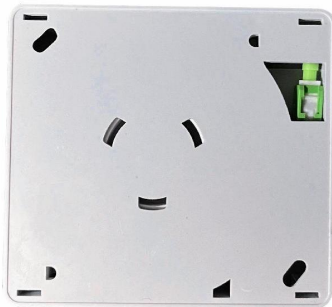

Quantity in Each Carton	90pcs in one carton
Carton Size	50*50*35.5cm
Gross Weight	11.5kg
Volume	0.088m ³

Operation Conditions

Temperature	-40℃ -- 60℃
Humidity	93% at 40℃
Air Pressure	62kPa – 101kPa
